

## WindBlade Flags

Standing tall, straight and wide, WindBlade Flags have a large rectangular print area. Choose horizontal or vertical to suit the message. The flag fabric is premium grade lock-knit fabric manufactured in NZ (single sided). For extra impact choose the new double-sided option for a correct reading message each way (for Small and Large Cosmic Flags).

WindBlade flags are suitable for indoor conditions and outdoors in winds up to 50kph (or 35kph for Double sided), they come in Small, Large and Extra Large options and pack a lot of punch for their height.

See D9 'Life of Flags' document for maximum longevity
